

Find Your Perfect Match with

And work happily ever after.

Oculus can help you find the perfect product for your office.

Looking for the right ophthalmic diagnostic tools to compliment your business?

At Oculus, we've been matching eye care professionals with the perfect products for more than 110 years. Here are just a few who are now working happily every after.

Meet Perfect Match #1.

Dr. Zhang

"I'm always traveling between offices, so I don't want a lot of baggage. Plus, I have extremely high standards."

Easyfield

"Petite, travels well, achieved Goldmann Standard — let's meet!"

From the moment he saw the Easyfield, Dr. Zhang was hooked. Lightweight, incredibly portable, smart, easy to use and affordable — this static perimeter is the total package.

You're compatible with the **Easyfield** if you want:

Portability —

Weighing less than 12 pounds, the Easyfield is so light you can carry it between offices.

Intelligence —

The Easyfield is designed with a Goldmann standard 30-cm bowl, as well as 30-2, 24-2 and 10-2 grids.

Accuracy —

This static perimeter comes with single point, quadrant and user-defined tests, along with three threshold strategies that test out to 30°.

Simplicity —

Because the Easyfield starts instantly, you never need to boot up. Plus, its straightforward statistical functions include grayscale, cumulative loss curves, 3-D animation, and age-related normal comparisons.

All in One —

Everything you need is included with the Easyfield: a CCD camera, color LCD display, built-in printer— even free software updates and upgrades for as long as you own it.

Choice —

You can afford to be picky: The Easyfield comes in an integrated control console and a PC/laptop model, both reasonably priced.

**The World's Smallest,
Smartest Perimeter —
Weighs Just 12 Pounds.**

You're compatible
with the **Easygraph**
if you want:

Compactness —

This tiny topographer measures just 8.5 inches high.

All Your Needs Met —

With the Easygraph, you'll have all the tools you need for corneal refractive therapy, refractive surgery and contact lens fittings.

Unsurpassed Resolution —

The Easygraph features an industry-leading 22,000 measuring points, 22 measuring rings and digital data transmission.

Real "Ks" —

The built-in keratometer gives you real "K" readings, not simulated guesses.

Patient Comfort —

Your patients will appreciate the Easygraph's thoughtful design with a rotating bezel and nasal notch-out.

Options —

The Easygraph uses USB connectivity and runs on Microsoft Windows® compatible software. Plus, it easily mounts on a standard slip lamp.

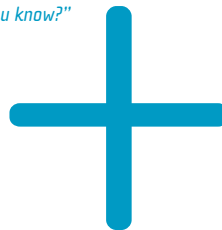

**A Full-Feature Corneal
Topographer That's Only
8.5 Inches High.**

Meet Perfect Match #2

Donna K.

*"I'm the sensitive type. I
really need to feel
comfortable, you know?"*

Easygraph

*"Gentle, considerate —
and easy on the eye."*

For Donna K., it was love at first sight. The Easygraph gave her ophthalmologist all the tools he needed for her corneal refractive surgery, as well as the most comfortable contact lens fitting possible.

Meet Perfect Match #3

Dr. Bernstein

*"I'm a big picture person.
My ideal needs to have a
broad outlook on things."*

Centerfield II:

*"I've got a 36° view of
the world — but for you,
I'll expand to 70°."*

Once Dr. Bernstein saw the Centerfield II, everything about his practice became crystal clear. Now he gets automatic static, kinetic and color perimetry, screening, three threshold measurements and more — all in one compact product.

You're compatible
with the **Centerfield II**
if you want:

Flexibility —

The Centerfield II automatically performs static and kinetic perimetry with a 36° visual field — and with a simple fixation shift, you can test out to 70°.

Color —

Add more color to your practice with both white-on-white and blue-on-yellow displays.

Precision —

With The Centerfield II's Goldmann standard 30-cm bowl, 10 candela background luminance and 30-2, 24-2 and 10-2 test grids, you get precise measurements and displays every time.

More Configurations —

Add 250 user configurations and you have all the programs you need to screen for glaucoma, macula and more.

High Performance —

The Centerfield II outperforms interpolation-based algorithms via the new, faster optional CLIP (Continuous Light Increment Perimetry).

Ease and Speed —

Designed for PC/laptop use, the Centerfield II includes a full statistics package with cumulative loss curve, probability maps and comparisons.

**A Precise, Compact Perimeter
That Expands to 70°.**

You're compatible
with the **Keratograph III**
if you want:

Real "K" Readings —

The Keratograph III's built-in keratometer provides you with real "K" readings, not simulated guesses.

Versatility —

This topographer works equally well for refractive surgery or multi-focal contact lens fittings.

Faster Evaluations —

You'll be a quick study with the Keratograph III's 3-D overview, fluo-image simulation and corneal reflective therapy software.

Peak Performance —

The Keratograph III performs pre- and post-op comparisons, as well as Fourier and Zernike analyses. Plus, it includes Keratoconus detection software.

More Measurements —

You can measure 22,000 points – 7,000 more points than the competitor – with 22 rings and extremely high resolution.

Optimal Pre-LASIK Testing —

With the optional Pupillometer – *an Oculus exclusive* – you can measure your patients' pupils in total darkness and test pupil diameter with and without glare.

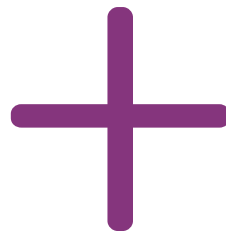

**The Only Topographer With a
Real Built-in Keratometer.**

Meet Perfect Match #4

Dr. Taylor-Wright

*"I'm incredibly meticulous.
To be honest, few can meet
my demands."*

Keratograph III:

*"Precision is my
middle name."*

Dr. Taylor-Wright and the Keratograph III are of like minds. The German-engineered topographer has a built-in keratometer, so she gets real "K" readings every time — with no more simulated guesses.

Found *your* match?

We can help. Just give us a call at 1-888-284-8004 and we'll match you with the perfect Oculus product.

Every Oculus product features German innovation and precision design, which means you can always be sure of dependable, accurate diagnoses. And if you purchase yours by **June 1, 2007**, you'll also receive a 10% discount, free contact lens fitting software or free Kerataconus detection software. This offer expires soon, so act now!

Call 1-888-284-8004 or return the attached postcard today!

Let Oculus help you find your perfect match.

Purchase your Oculus product
by June 1, 2007 and receive a
10% discount, free contact lens
fitting software or **FREE**
Kerataconus detection software!
